-This participatory art project aims to alleviate 'plant blindness' and encourage us to reconnect to the natural world that surrounds us.

Receive two native plants - gift one to a friend or loved one and keep one for yourself. When offering your plant gift, you're encouraged to share a 'plant story' of your own.

This event is supported by Queensland University of Technology, More-Than-Human Futures Research Group.

Artists: Keith Armstrong, Rachael Haynes, Leah King-Smith, Courtney Pedersen, Charles Robb
